

Dhruvinsinh Rathod

Master's Student in Computer Science (Informatik), Paderborn University
Paderborn, Germany | +49 155 1082 6823 | [E-Mail](#) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience in backend development, APIs, SQL and process automation. Currently pursuing a master's degree in computer science at Paderborn University, with a focus on Python, AI and data-driven software solutions.

PROFESSIONAL EXPERIENCE

Accenture Solutions Private Limited, Pune, India

07/2021 - 03/2025

Software Engineer

- Automated recurring data operations using Spring Batch, server-side scripts, and Astra, reducing manual effort in enterprise workflows.
- Coordinated healthcare data migrations across 9+ regions, including 3+ production migrations, with SQL-based validation and consistency checks.
- Analyzed and documented end-to-end SQL data flows; optimized complex Oracle SQL queries for validation, reporting, and production support.
- Developed 20+ REST APIs and microservices using Java and Spring Boot, supporting CI/CD delivery with Git and Jenkins.

EDUCATION

Paderborn University, Paderborn, Germany

04/2025 - 03/2028 (expected)

Master of Science in Computer Science

Relevant Coursework: Data Driven Engineering, Machine Learning for Biometrics, Knowledge Graphs, Web Security.

Gujarat Technological University, Gujarat, India

08/2017 - 06/2021

Bachelor of Engineering in Computer Engineering, CGPA: 8.88(Equivalent German GPA: 1.5)

TECHNICAL SKILLS & COMPETENCIES

- Programming & Data:** Python, Java, SQL, JavaScript
- AI & Machine Learning:** PyTorch, Transformers, LLMs, Data Analytics
- Software Development:** Spring Boot, REST APIs, Microservices, Django
- Databases & Cloud:** PostgreSQL, Oracle SQL, Microsoft Azure
- Tools:** Git, GitHub, Jenkins, CI/CD, Linux
- Languages:** English (C1), German (A2)

PROJECTS

How to Train Your Large Language Model (Ongoing)

- Developed a **hybrid multilingual LLM adaptation pipeline** using LoRA experts, an embedding model, and routing techniques across 200+ languages.
- Automated training, evaluation, and expert-routing workflows using **Python, PyTorch, and Transformers**, achieving **93.27% Top-1 routing accuracy**.

Machine Unlearning – Backdoor Attacks on Face Recognition

- Investigated whether **machine unlearning can activate hidden backdoors in face-recognition models** when specific identities are selectively forgotten.
- Analysed **neuron activation patterns and model behavior before and after unlearning** to study security risks while preserving normal recognition performance.

Smart Attendance System (Bachelor's Project)

[Project Link](#)

- Developed a role-based Django **attendance portal integrating browser-camera input with OpenCV/LBPH** face recognition to automate student identification and attendance recording.
- Designed an end-to-end workflow covering student enrollment, live recognition, three-frame confirmation, manual correction, session finalization, database persistence, and CSV report export; added automated tests for core attendance and authorization flows.

CERTIFICATIONS & AWARDS

- Certifications:** Oracle Java SE 8 Programmer; Microsoft Power Platform Fundamentals; Microsoft Azure Fundamentals.
- Awards:** IEEE Richard E. Merwin Student Scholar; IEEE Computer Society “20 in their 20's”; IEEE India Council Outstanding Student Volunteer Award.
